

## **TSP Next Generation Leaders Program**

One of the critical TSP's sustainability pillars is the continued growth of a youthful generation of leaders committed and passionate about leadership. At its meeting on 5th April 2024 the NGC/NEC approved a program that interfaces with the requirements related to Special Interest Groups (SIGs) that would support young people to channel their energy, creativity to step into leadership roles to shape the next generation of policies, values and more democratic political parties.

Consequently, over the next three years, TSP will engage up to 75 young leaders already active in the party and other types of leadership; and who are keen on matters governance and sustainable political parties in Kenya.

Further, where possible, TSP will work with schools in areas where the party has elected leaders, to expose in-school youth to leadership conversations either through their debate clubs, exposure tours and 'Know Your Constitution, Citizen Responsibilities, Electoral Process and Political Parties' Card Game as a way building the young leaders knowledge in leadership and politics.
